Subject to changes by carriers - Consult the current carrier Rules Tariff

- Updated 06/2011 - The chart only lists maximum liabilities for shipments transported within the U.S.

The maximum value per pound is arrived at by determining the actual class of the articles tendered, if exception rated (FAK), the maximum value per pound applies to the class the shipment was rated at.

Most carriers limit their liabilities for high value items, such as plasma or LCD TV's copiers, coins, stamps, art etc. - see the individual Rules Tariffs for details

Carriers reserve the rights to limit their liabilities on items not packaged in accordance with the NMFC packaging guidelines
